Customer Problem Statement

A well-articulated customer problem statement allows the team to find the ideal solution for the challenges customers face, by empathizing with how they perceive the current process.

PS No.	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	an employee who needs to organize meetings	book a meeting room quickly and confirm it instantly	I have to call/email the admin and wait for a manual reply	there is no centralized, real-time room booking system	frustrated, anxious about double- booking
PS-2	an administrator managing office facilities	track and manage all meeting room bookings accurately	I rely on scattered spreadsheets, emails and phone calls	there is no automated system to validate, store and report bookings	overwhelmed and prone to manual errors

Summary

- Employees need a fast, self-service, conflict-free way to book meeting rooms.
- Administrators need an automated, centralized way to track, approve and report on bookings.
- Both problems stem from the absence of a digital, centralized booking platform — directly addressed by the proposed ServiceNow application.
