

Ideation Phase

Brainstorm & Idea Prioritization

Date	30 June 2026
Name	Nadin Surya S
Project Name	Meeting Room Booking System using ServiceNow App Engine Studio
Maximum Marks	4 Marks

Step 1: Team Gathering & Problem Statement

The team reviewed the problem statements and framed the following focus question for the brainstorming session:

“How might we simplify and automate the meeting room booking process for employees and administrators?”

Step 2: Brainstormed Ideas

#	Idea
1	Online digital form for submitting meeting room booking requests
2	Auto-number generation for unique booking IDs
3	Real-time room availability check before confirming booking
4	Client-side validation to prevent invalid time selection (end time > start time)
5	Automatic default status assignment (Pending) on new booking
6	Flow Designer automation to process booking events
7	Automated email notification on booking creation
8	Admin approval workflow (Pending → Approved → Completed)
9	Centralized booking history for all meeting rooms
10	Dashboard with booking status, room-wise and trend charts
11	Detailed reports for status, room usage and booking trends
12	Role-based access for Employee and Admin
13	Recurring booking option for regular meetings (future scope)
14	QR code based room check-in (future scope)
15	Mobile-friendly booking access (future scope)

Step 3: Idea Grouping

Group / Theme	Related Ideas
---------------	---------------

Booking & Validation	Online booking form, auto-number generation, room/date/time fields, client script for end-time validation
Automation & Workflow	Business rule for default status, Flow Designer automation, admin approval workflow
Notification	Automated email notification on booking creation and status updates
Reporting & Analytics	Dashboard (total bookings, status chart, room-wise chart, trend chart) and detailed reports
Future Enhancements	Recurring bookings, QR code check-in, mobile-friendly access

Step 4: Idea Prioritization (Importance vs Feasibility)

Idea	Importance	Feasibility	Priority
Online booking form with validation	High	High	Must Have
Auto status & business rule automation	High	High	Must Have
Email notification on booking	High	High	Must Have
Admin approval workflow	High	High	Must Have
Dashboard & reports	High	Medium	Should Have
Recurring bookings	Medium	Low	Could Have
QR code check-in	Low	Low	Future Scope
Mobile-friendly access	Medium	Low	Future Scope

Based on the prioritization, the “Must Have” ideas (online booking form with validation, automated status assignment, email notification and admin approval workflow) form the core scope of the Meeting Room Booking System, while dashboard/reports are included as “Should Have” features. Recurring bookings, QR check-in and mobile access are identified as future enhancements.
