

Project Design Phase-II

Data Flow Diagram & User Stories

Date	30 June 2026
Name	Nadin Surya S
Project Name	Meeting Room Booking System using ServiceNow App Engine Studio
Maximum Marks	4 Marks

Data Flow Diagram

The Data Flow Diagram (DFD) below shows how data moves through the Meeting Room Booking System — from booking submission by the employee, through validation and automation, to admin approval, storage, notification and reporting.

User Stories

The table below lists the user stories for the Meeting Room Booking System, covering both the Employee and Administrator roles.

User Type	Functional Requirement (Epic)	User Story #	User Story / Task	Acceptance Criteria	Priority	Release
Employee	Login	USN-1	As an employee, I can log into the ServiceNow portal using my company credentials so that I can access the booking application.	I am redirected to the application homepage after successful login.	High	Sprint-1
Employee	Room Booking	USN-2	As an employee, I can open the Meeting Room Booking form so that I can enter my booking details.	The booking form opens with all required fields visible.	High	Sprint-1
Employee	Room Booking	USN-3	As an employee, I can select a room, date, start time and end time so that I can reserve a room for my meeting.	I can choose from Conference Room A/B, Training Room, or Interview Room with valid date/time pickers.	High	Sprint-1
Employee	Room Booking	USN-4	As an employee, I can enter the purpose of my meeting so that the reason for the booking is clear.	The Purpose field accepts and saves free text.	Medium	Sprint-1
Employee	Validation	USN-5	As an employee, the system validates that the End Time is later than the Start Time so that I avoid submitting an invalid booking.	An error message blocks submission when End Time $\leq$ Start Time.	High	Sprint-1
Employee	Booking Confirmation	USN-6	As an employee, I receive an auto-generated Booking ID (e.g. MRB0001001) upon submission so that I can track my request.	A unique booking number is visible immediately after submission.	High	Sprint-1
Employee	Booking Confirmation	USN-7	As an employee, I receive an email confirmation after booking so that I have proof of my reservation.	An email with booking details is received within a few minutes of submission.	High	Sprint-2
Employee	Booking Status	USN-8	As an employee, I can view the status of my booking (Pending / Approved / Completed) so that I know whether it is confirmed.	The current status is visible on the booking record.	High	Sprint-2
Employee	Booking History	USN-9	As an employee, I can view my past bookings so that I can refer to previous meeting details.	A list of my historical bookings is available to view.	Medium	Sprint-2
Administrator	Booking Approval	USN-10	As an administrator, I can view all submitted booking requests so that I can manage room reservations.	All bookings appear in a centralized list, filterable by status.	High	Sprint-2
Administrator	Booking Approval	USN-11	As an administrator, I can approve a booking request so that the employee is notified the room is confirmed.	Status changes to Approved and is reflected to the employee.	High	Sprint-2
Administrator	Booking Approval	USN-12	As an administrator, I can mark a booking as Completed after the meeting so that the room status is updated.	Status changes to Completed once selected by the admin.	Medium	Sprint-3
Administrator	Reporting & Dashboard	USN-13	As an administrator, I can view a dashboard with booking status, room-wise and trend charts so that I can monitor room utilization.	Dashboard displays total bookings, status chart, room-wise chart and trend chart.	Medium	Sprint-3
Administrator	Reporting &	USN-14	As an administrator, I can generate	Reports for status, room-	Low	Sprint-3
