

# MEETING ROOM BOOKING SYSTEM

Customer Journey Map — ServiceNow App Engine Studio Project

**SCENARIO**  
Employee books a meeting room through the ServiceNow application, and the administrator manages the booking from approval through to completion.

| JOURNEY PHASE        | 1. DISCOVER<br><i>Employee becomes aware of the need and the app</i> |                                                                  | 2. ACCESS APPLICATION<br><i>Employee opens and explores the booking app</i> |                                                              |                                                             | 3. SUBMIT BOOKING<br><i>Employee fills and submits the booking form</i> |                                                          |                                                         |                                                             | 4. BOOKING MANAGEMENT<br><i>System validates, automates, and admin reviews</i>  |                                                                  |                                                            |                                                         | 5. COMPLETION & FEEDBACK<br><i>Meeting concludes; data updates for insight</i> |                                                |                                                    |
