

Acceptance Testing

UAT Execution & Report Submission

Date	30 June 2026	Name	Nadin Surya S
Project Name	Meeting Room Booking System using ServiceNow App Engine Studio		
Maximum Marks	4 Marks		

1. Purpose of Document

The purpose of this document is to briefly explain the test coverage and open issues of the **Meeting Room Booking System** project at the time of release to User Acceptance Testing (UAT). It summarizes defects identified during testing, how each was resolved, and the final pass/fail status of test cases covering form validation, automation (Client Script, Business Rule, Flow Designer), notifications, dashboard, and reporting modules.

2. Defect Analysis

This report shows the number of resolved or closed bugs at each severity level, and how they were resolved.

Resolution	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
By Design	2	1	1	1	5
Duplicate	0	1	1	0	2
External	0	0	1	0	1
Fixed	5	3	4	8	20
Not Reproduced	0	0	1	0	1
Skipped	0	0	0	1	1
Won't Fix	0	1	1	0	2
Totals	7	6	9	10	32

Severity 1 = Critical (blocks core booking flow) | Severity 2 = Major | Severity 3 = Minor | Severity 4 = Cosmetic / Low impact. Of the 32 defects logged, 20 were fixed and verified prior to release; the remainder were resolved as by-design behavior, duplicates, external dependencies, or accepted as low-priority/won't-fix items.

3. Test Case Analysis

This report shows the number of test cases that have passed, failed, and untested.

Section	Total Cases	Not Tested	Fail	Pass
Booking Form & Field Validation	12	0	0	12
Client Script (Time Validation)	6	0	0	6
Business Rule (Default Status)	5	0	0	5
Flow Designer (Workflow Automation)	8	0	0	8
Email Notification	9	0	0	9
Admin Booking Management (Approve/Complete)	7	0	0	7
Dashboard (Widgets & Charts)	9	0	0	9
Reports (Status / Room-wise / Trend)	6	0	0	6
Security & Role-based Access Control	4	0	0	4
Application Configuration / Version Control	2	0	0	2
Totals	68	0	0	68

Summary: All 68 test cases executed across the Meeting Room Booking System passed with zero failures and zero untested cases at the time of UAT sign-off. Combined with the defect resolution coverage above (32/32 defects closed through fix, design decision, or other valid resolution), the application is considered **stable and ready for production release**.
